DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1, 3, 7, 8, 12, 42, 43, 45, 46, 49, and 50 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

3. Claim 1 recites the limitation "the plurality of containers" in line 4. There is insufficient antecedent basis for this limitation in the claim.

4. In claims 42, 43, 45, 46, 49, and 50 the Applicant is required to clarify to what the claim is intended to be drawn to, i.e., either the drug package alone or the combination of the drug package and the drug delivery device. The Applicant sets forth the combination of the package and the device when describing the what the device is (a nebulizer), which is inconsistent with preamble and body of claims 39, 40, and 47, that sets forth the subcombination of drug package (the bodies of the claims do not positively claim the drug delivery device). Applicant is required to make the language of the claims consistent with the intent of the claims

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claim 19 is rejected under 35 U.S.C. 102(b) as being anticipated by Tso 5890016.

7. Tso teaches an electronic data carrier comprising: a memory located within the electronic data carrier; and an output for transmitting information via a radio frequency signal (col. 3, line 39-45).

8. Claims 47 and 48 are rejected under 35 U.S.C. 102(b) as being anticipated by Gordon 4617557.

9. Gordon teaches a drug package comprising: a plurality of drug containers, each container containing a drug; an electronic data carrier separate from the drug containers, the carrier including drug treatment information, wherein the data carrier is a radio frequency device; wherein the drug treatment information includes at least one of the following items; a desired frequency of treatments (col. 2, lines 22-30).

Allowable Subject Matter

10. Claims 13, 16-18, 20, 21, 39, 40, 41, and 44 are allowable over the prior art of record.
